ENERGYS GROUP

---

**Energys.co - ENERGYS GROUP** - is a corporation committed to the world environmental and energy development. This organization is composed by a professional team aimed at the commercialization of hydrocarbons, coal, petroleum coke, mineral concessions, and equipment of the petroleum industry, cleaning and maintenance of oil wells.

Our experience in the industry of hydrocarbons and all kinds of coals, and the knowledge we have acquired through the years, allow us to be an excellent option for our clients.

We apply all our understanding to develop your most ambitious projects to a low risk and with a high productivity.

**Energys.co - ENERGYS GROUP** - offers an efficient and timely service in all the acquisition oil process, gas, coal, mining industry and petroleum products.

Our greatest strength is the accomplishment, commitment and adaptation to all our clients' necessities. This business culture strengthens your enterprise.

# The Company

---

**Energys.co - ENERGYS GROUP** - is an investment and oil-trading company with offices in Panamá, Houston, Caracas, Miami, and Bogotá, with associated bureaus in Rotterdam, Spain, Russia and Dubai.

**Energys.co - ENERGYS GROUP** - trades products from refineries in Houston and PDVSA (Petroleum of Venezuela S.A.). Moreover we offer agreements with refineries of Center America, Russia, Saudi Arabia, Nigeria and Dubai.

# Company mission

---

Be a leader company in the oil trading, mining and gas with a sustained and profitable growth under the premise of environmental sustainability. For this reason, we operate in a safe, reliable and responsible way in order to reduce our business' negative impact on the environment, offering always the best products and services to our clients through a corporate culture of efficiency and compliance.

Our efforts are aimed to overcome the competence through the continuous improvement process and the professional growth of our employees in an inclusive work environment that allow workers to contribute in the company success and development.

# Corporate Business Principles

---

## **Environmental sustainability**

We commit ourselves to decrease our business' negative impact on the environment reducing emissions and waste.

## **Corporate citizenship**

We comply the laws of every country and our sustainability allows social and economic benefits not only for our company but also for the society.

## **Honesty and Respect Policies**

Our greatest quality is the excellent reputation we have in the market. We conserve high standards of business ethics and integrity; we apply strict principles of corporate governance and transparency in the development of all our operations.

**We are your best associate, you and your company can count on us**

## **Continuous Improvement Process**

We have the best professional team, who are at your service to develop your projects. The scientific and technological innovation is part of our corporate culture.

Investigation and industrial development of hydrogen from renewable resources

*Info@energyshydrogen.com / [www.energyshydrogen.com](http://www.energyshydrogen.com)*

---

**[www.energys.co](http://www.energys.co)**  
**ENERGYS GROUP**

Energys Hydrogen belongs to the Holding company Energys Group.

We are a company dedicated to industrial development of hydrogen from renewable sources.

We carry out permanent investigation and technological developments of low voltage hydrolysis, gas management, electrolytes and controlled placement of plates from rain or distilled water for the production of hydrogen that contribute to the conservation of the environment through reduction of the use of fossil fuels, low emissions, increased power and decarbonization.

## **Values:**

---

We work positively in team work with our allies to build new projects with planned execution where everybody wins.

# New technologies for hydrogen production

## Investigation and development areas

### HYDROGEN VEHICLE / BENEFITS:

- It converts your light or heavy vehicle to a low-emission hybrid
- With a gallon of water one vehicle (light or heavy) travels more than 1.000 kms.
- Reduces (20%-30%) fossil fuels like gas, diesel, vehicle gas.
- Increases engine power > 20% HP.
- Decarbonizes the engine.
- Cools down the engine.
- Reduces use and cleans oil.
- Does not affect the engine
- Does not intervene the engine.
- Easy installation (1 hour).
- Maintenance (6 months).
- Low use of electrical energy (12v).
- Lower price than the conversion to vehicular gas.

### **HYDROGEN PRODUCER EQUIPMENT FOR STATIONARY ENGINES AND ELECTRIC GENERATORS / BENEFITS**

- 20%-30% reduction in the use of fossil fuels such as diesel, gasoline and gas.
- Gas separation (oxygen-hydrogen) from rain or distilled water.
- Increase in power above 10% in kw.
- Low use of electrical energy.

### **STOVES OR KITCHENS THAT RUN ON WATER FOR HOME OR INDUSTRY / BENEFITS:**

- Production of controlled candle or flame heat from hydrogen production.
- With a gallon of rain or distilled water you can cook for 2 months.
- Elimination of burning wood for cooking.
- Low use of electrical energy (12v).
- Likely to be generated by battery or solar panel in places without electrical connection.

### **EQUIPMENT FOR BOILERS, OVENS, HEATERS / BENEFITS:**

- 20%-30% reduction in the use of fossil and solid fuels such as diesel, gasoline and gas.
- Gas separation (oxygen-hydrogen) from rain or distilled water.
- Low use of electrical energy.

### **SUCCESS CASES**

Adelca. (heating ovens). Ecuador / Agropesa. (boilers). Ecuador / Agripac. (boilers). Ecuador / los chillos complex. (boilers). Ecuador / Hidalgo & Hidalgo (asphalt oven and tractor unit). Ecuador / Camaronera/ Isla puna (stationary engines, bombs) Ecuador / Francisco mero (fishing vessels). Manta / loja tire retreader (oven). Ecuador / Fundametz (ovens, trucks, cars). Ecuador / Hugo Zea (decarbonizer), Cuenca Ecuador / Mario landucci (decarbonizer), Guayaquil Ecuador / Sports concentration of pichincha (calderas) Ecuador / Alejandro Polits pool (calderas). Chone shrimp farm (stationary engines, bombs). Ecuador / Jorge Ruiz (decarbonizer). Guayaquil. Ecuador / exported industrial equipments to Mexico, Chile, Guatemala, Costa Rica / More than 1.000 vehicles converted to hybrids (hydrogen) circulating for more than a year. Ecuador- Colombia.

# Environment

---

**Energys.co - ENERGYS GROUP** - is commitment to the sustainability and environmental protection. All the work we carry out in the different regions in which we operate, have a standard of "clean world for future generations".

We abide by the agreements outlined in the "Kyoto Protocol" an international agreement linked to the United Nations Framework Convention on Climate Change, which was adopted on 11 December 1997 in Kyoto, Japan in order to reduce emissions of greenhouse gases and protect the planet.

# Products

---

We offer practical solutions at a low cost, based on a system of risk reduction, the implementation of high technology in the development of your projects increasing productivity.

In the fuel market products and services we offer:

- Crude Oil
- D-2 Diesel
- Marketing and exploitation of coal
- Coke
- Gas
- Liquefied petroleum gases
- Gold mining exploitation
- Petroleum equipment Industry
- Cleaning of oil wells
- Transportation of combustibles and coal
- Exploitation and drilling of oil wells.

# Services

[www.energys.co](http://www.energys.co)  
ENERGYS GROUP

We are a company committed to the environmental protection, composed by a professional and specialized team with a great experience in the petroleum market.

- Specialized studies on oil
- Drilling and rehabilitation fields
- Stimulation and package
- Injection of high and low pressure,
- Electronic registration
- Fishing tools
- Material suppliers for drilling oil wells.
- Exploitation and drilling of oil wells.

We have participated in the development of important projects of drilling and trading oil in countries such as Venezuela.

The company counts on a variety of steamship companies responsible for transporting crude oil and petroleum products from any point of origin to its final destination. We adjust to your needs, technical requirements and delivery terms in order to satisfy the demands of our customers, offering a specialized service with the highest standards of quality, with all the requirements and standards of the oil industry worldwide.

## Investment Projects

---

ENERGYS GROUP associates with investors worldwide for the development of fuel products such as crude oil, D2, YetA1, gasoline where we have the best prices and CIF shipments to anywhere in the world; coal, assembly and maintenance of refineries, oil fields.

Our company ensures the success of its operations thanks to the seriousness and commitment to our clients and associates for 25 consecutive years in the world market and the excellent relations with Partner refineries on the 4 continents.

**¡Bring your money, we produce profits!**
